

Experiment -1 (Setting Up a Jenkins Job for Maven Build)

Objective: Create a Jenkins Job that builds a maven project using Jenkins and triggers build on changes in the version control repository.

1. Create a basic maven Project.

```
src > main > java > mj > App.java > ...
1  package mj;
2
3  /**
4   * Hello world!
5   *
6   */
7  public class App
8  {
9      Run | Debug
10     public static void main( String[] args )
11     {
12         System.out.println( x:"Hello World!" );
13     }
14 }
```

2. Push the Maven project to GitHub repository.
